

Reference petition #RM-10620 submitted by Dale Reich, K8AD, I totally agree with and support this proposal 100%. I hope the FCC will give it top priority and serious consideration. I honestly think this will boost the moral of whole amateur community. As the holder of an Advanced Class Licence for over 20 years and very active in amateur radio in variuos modes I think the biggest comment I heard on the air ways, in emails and at club meetings was that no one could believe that the FCC didn't do this right away when they made the last big change. Thank You and I hope this petition will get great support from the Amateur Community and the FCC HQ's. David S. McCallum, w7sac
